Charges are per dose, per day. Complicated or difficult medications will have an extra handling charge.

Medication will be defined as any pill, tablet, ointment, liquid, spray, etc given to your pet. Anything that is not 'food'. We need the detailed information requested about EACH medication. There will be a penalty charged if we are not given this information about medications. So please, if the treatment isn't medically necessary, leave it at home.

We do our best to monitor your dogs health and medications, but we are not veterinarians and not trained to treat medical emergencies. If your dog is medically fragile, we recommend boarding with your vet.
